Professional Experience

TAQA Arabia – Gas Arm

Senior IT Operations Lead

Cairo, Egypt | Apr 2014 – Present

- Own day-to-day IT service delivery and global service desk operations for users in Egypt, Dubai, Nigeria, and Senegal across 24/7 environments.
- Manage Incident, Request, and Problem Management using ITIL-aligned processes, ensuring SLA adherence and rapid resolution of critical issues.
- Act as escalation point for major incidents, coordinating infrastructure, security, and application teams to restore services quickly.
- Monitor ticket queues, workload distribution, and service performance using Service Desk platforms.
- Lead and support regional IT teams and service desk engineers, ensuring consistent service quality and customer satisfaction.
- Maintain and improve knowledge base, troubleshooting guides, and standard operating procedures.
- Manage identity and access provisioning through Active Directory and Intune, ensuring security and compliance.
- Oversee endpoint management, security, and patching for enterprise users.
- Own backup, disaster recovery, and business continuity systems for critical PRMS and production sites.
- Drive continuous service improvement by analyzing ticket trends, root causes, and automation opportunities.
